Work in Progress

- *Incentives, Effort, and Gender in Professional Tennis* (with Prakarsh Singh).
 - Measures effort responses to changes in prize structure using match-level data of performance and ability and a Difference-in-Differences methodology.
- Employment Protection Design and Firm Litigation: Evidence from Gujarat.
 - Uses spatial variation in labor law within Gujarat to test whether the design of employment protection legislation shapes firm litigation.
- Dismantling Dismissal Protection: Evidence from Indian Plant-Level Data (with Prakarsh Singh and Saurabh Gupta).
 - Uses plant-level Annual Survey of Industries panel data and staggered difference-in-differences across reforming states to estimate how removing dismissal protections and increasing severance reshapes employment and employee wage in firms of different sizes.

- *Front-Loaded vs. Back-Loaded Incentives: Experimental Evidence.*
 - Lab experiments to test theoretical predictions on incentive timing and their effects on effort, persistence, and performance.
